## Glossary

|                      |  |
|----------------------|--|
| <b>Astragal</b>      | Used to seal between a pair of doors, it closes the clearance gap.   |
| <b>Back Band</b>     | A rabbeted moulding that is attached to the surrounding edge of a casing to add ornamental relief.   |
| <b>Base Cap</b>      | Installed on top of an S4S Board flush against the wall to add decorative style. Can also be used as versatile Panel Moulds or to conceal uneven floor and wall junctions.             |
| <b>Base Shoe</b>     | Are used to protect the base moulding from damage or to conceal imperfections such as uneven lines and cracks where the base moulding and floor meet.                                  |
| <b>Baseboard</b>     | Applied where the floor and wall meet to hide any imperfections and to protect the walls from kicks, bumps, and cleaning machinery.  |
| <b>Bead Board</b>    | A type of paneling which is covered in a series of distinctive grooves.  |
| <b>Bed Mould</b>     | Utilized where walls and ceilings meet. Beds can either be sprung or plain.  |
| <b>Brick Mould</b>   | Are used as exterior door and window casings. They are thick mouldings that allow bricks or other surfaces to butt up against the moulding.  |
| <b>Casing</b>        | Used to encase the area around doors or windows where the frame meets the drywall.   |
| <b>Chair Rail</b>    | Usually applied 32 - 36 inches up a wall from the floor, parallel to the baseboards, to prevent chairs from marking the walls. Nowadays, more commonly applied as a decorative detail. |
| <b>Chamfer Strip</b> | Utilized where kitchen cabinet tops meet the walls or as a linoleum cove. Sometimes used for window applications.  |
| <b>Cove</b>          | Coves are concave semicircular profiles on mouldings. They are most commonly used to build-up crown mouldings or as an inside corner guard where two walls meet.                       |
| <b>Corner block</b>  | Corner blocks are installed at the top of a door and at the corners of a window.   |
| <b>Crown</b>         | Installed where the ceiling and wall meet for a dramatic effect. Often referred to as a Cornice.   |
| <b>Door Stop</b>     | Stops are narrow strips of wood that are nailed to the head and side jambs of doors and windows. Stops constrict the movement of doors and windows.                                    |
| <b>Drip Cap</b>      | Applied over exterior window and door frames to keep water or moisture from seeping up under the siding. Drip Caps also direct water away from window glass. Also called Sills.        |
| <b>Flat Stool</b>    | An interior moulding that sits on the bottom of a window frame to serve as a sash or window frame sill cap that is not rabbeted or bevel rabbeted.                                     |
| <b>Glass Bead</b>    | Are used to hold glass windows in place and to add a profiled decorative look to the glass. Other names include: Glass Stop, Cove & Bead, Glazing Bead, Staff Bead, and Putty Bead.    |
| <b>Half Round</b>    | Are used as screen Mouldings, Shelf Edge Mouldings, or Panel Mouldings to achieve a smoother, rounder appearance.  |
| <b>Hand Rail</b>     | Used as a hand support or guide in a stairwell or hallway.   |

## Glossary

|                         |  |
|-------------------------|--|
| <b>Jamb</b>             | Top and side members of a door or window frame. Different styles of jambs include a one-piece flat jamb with a stop applied, a single or double rabbeted jamb, or a two-piece adjustable split jamb. |
| <b>Lattice</b>          | S4S mouldings that are small, versatile, and have plain profiles. Are most commonly used in trellis work.  |
| <b>Mullion Strip</b>    | Sometimes called Panel Strips, these mouldings are applied over window jamb edges in a multiple opening window. Mullion strips are also used for decorative wall treatments.                         |
| <b>Nosing</b>           | Often named Stair Nosing or Stair Tread, this piece is the rounded degree member that projects beyond the stair.   |
| <b>Outside Corner</b>   | Are used to protect or cover corners and ragged edges where wall coverings and painted surfaces meet. Are also called Outside Corner Guards.   |
| <b>Panel Mould</b>      | Panel mould is commonly used to frame wall coverings for a paneled effect. Panel Mould can also be applied on top of an S4S Board or cut in short lengths to make decorative patterns.               |
| <b>Paneling</b>         | Used to join even surfaces or span a two tiered construction pattern. Usually applied in fire place mantels, bar counters, or decorative shelving.   |
| <b>Picture Mould</b>    | Used near the ceiling around the circumference of a room to support hooks for hanging pictures.  |
| <b>Quarter Round</b>    | May be used to cover any recessed connection area, with such uses as an inside corner moulding or a base shoe.   |
| <b>Rabbeted Stool</b>   | Used as an interior moulding that sits on the bottom of a window frame to serve as a sash or as a sill cap.  |
| <b>Round</b>            | Full round profiles used most often as closet poles, room dividers or in crafts. Also called Dowels.   |
| <b>S4S Board</b>        | Surfaced Four Sides boards (S4S) are used for cabinetry work, shelf frames, and other utilitarian uses.  |
| <b>Screen Mould</b>     | Is used to cover seams where the screening is secured to the screen frame and to cover shelf edges.  |
| <b>Shingle Mould</b>    | Originally used on the rake of a building or around exterior window frames. May also be used in applications similar to Panel Moulds.  |
| <b>T-Astragal</b>       | Like a flat astragal, the T-Astragal stops a door from swinging. Attached to one side of a door that is rabbeted to a T-Shape to the approximate thickness of the swinging door.                     |
| <b>Threshold</b>        | Used at the bottom of a doorway entrance to cover two different floor coverings or to close a gap between the floor and door. Usually beveled or tapered.  |
| <b>Transition Strip</b> | Transition strips provide a smooth shift between different flooring types. Transition strips are both visually and physically pleasing.  |
| <b>Wainscot Cap</b>     | Used to cover the top edge of Wainscot for esthetic purposes. Also called a Dado Cap or Ply Cap.   |

## Combining mouldings to your unique taste

Combining is the art of assembling multiple mouldings together to create a custom design. The possibilities are endless and the effect is absolutely stunning. Here are some of my timeless and inspiring combination ideas to get you started.

*Alexandria*

### Baseboard

*Brilliant trick!*  
Stack both mouldings, choosing to leave an optional space. Paint all the same colour to create the illusion of a voluminous baseboard.
